1 Introduction

This gap analysis proposal is a follow up to Extension Pack EP253 *Extensions for CAT/FIX Mapping*. One of the extensions proposed by the CAT/FIX mapping (<https://www.fixtrading.org/packages/mapping-cat-fix-phase-2a-equities/>) was to add the TrdRegTimestamps component to some of the quote messages to convey regulatory timestamp information. EP253 added new fields the TrdRegTimestamps component and new values to TrdRegTimestampType(770) but did not add the component to all messages required for CAT.

2 Business Requirements

2.1 CAT Timestamp Mappings

Regulatory timestamps are covered in FIX with the repeating group TrdRegTimestamps. CAT uses this component together with a number of values from TrdRegTimestampType(770) to convey its regulatory timestamps. The following FIX message types are required for CAT Phase 2A and currently do not have the TrdRegTimestamps component.

- **Quote(35=S)**, CAT events MENQ, MEQR
- **QuoteStatusReport(35=AI)**, CAT event MEQC

2.2 CAT Quote Attributes

The repeating group QuoteAttributeGrp is a generic component that is already part of the Quote(35=S) and QuoteAck(35=CW) messages. CAT also requires it on the QuoteStatusReport(35=AI) message to convey the quote issuer status and to identify whether a bid or ask is requested.

It is proposed to add the QuoteAttributeGrp component to the QuoteStatusReport(35=AI) message.
