## 1 Introduction

This gap analysis proposal is a follow up to Extension Pack EP253 *Extensions for CAT/FIX Mapping*. Some of the extensions proposed by the CAT/FIX mapping (<https://www.fixtrading.org/packages/mapping-cat-fix-phase-2a-equities/>) were not included in EP253 and are covered with this proposal.

### 1.1 Summary of changes

The following changes are made by this proposal.

#### **Message NewOrderSingle(35=D)**

- Add the component TrdRegPublicationGrp.
- Add the fields TradeReportingIndicator(2524), AffiliatedFirmsIndicator (2525).

#### **Message ExecutionReport(35=8)**

- Add the fields AffiliatedFirmsIndicator (2525).

#### **Message TradeCaptureReport(35=AE)**

- Add the fields TradeReportingIndicator(2524), ManualOrderIndicator(1028), ExecRefID(19).

#### **Field DeskType(1033)**

- Add the value "FB"

#### **Field TrdRegPublicationType (2669)**

- [Amendments to the elaborations of the values added by Extension Pack EP253.](#)

## 2 Business Requirements

### 2.1 Trade Reporting Indicator

The field TradeReportingIndicator(2524) allows a broker/dealer to instruct if the CAT event should be reported on their OEMS. Retail systems will need this where they have an OEMS to OEMS workflow and have to dictate which OEMS will be responsible for reporting specific CAT event.

TradeReportingIndicator(2524) is currently only available on the ExecutionReport(35=8) message. The following FIX message types are required for CAT Phase 2A and it is proposed to add this field to them to support the stated CAT event(s).

- **NewOrderSingle(35=D)**, CAT events MECO and MEOR
- **TradeCaptureReport(35=AE)**, CAT events MEOT(S), MEOF, MEFA

### 2.2 Affiliated Firm Indicator

The field AffiliatedFirmsIndicator(2525) allows to indicate if the CAT routing party is an affiliate of the receiving CAT Industry Member when routing between two IMIDs of the same legal entity, i.e. belonging to the same broker-dealer.

AffiliatedFirmsIndicator (2525) is currently only available on the TradeCaptureReport(35=AE) message. The following FIX message types are required for CAT Phase 2A and it is proposed to add this field to them to support the stated CAT event(s).

- **NewOrderSingle(35=D)**, CAT event MEOR
- **ExecutionReport(35=8)**, CAT events MENO, MEOA

### 2.3 Manual Order Indicator

The field ManualOrderIndicator(1028) allows to indicate that a CAT event (e.g. order route) did not occur due to an electronic message being sent.

ManualOrderIndicator(1028) is currently not available on the **TradeCaptureReport(35=AE)** message and has previously only been used in the context of orders but not for trades. This is required for CAT Phase 2A and it is proposed to add this field to support the CAT events MEOT, MEOF, and MEFA.

### 2.4 Receiving Desk Types

The field DeskType(1033) allows to indicate the type of desk or department within the firm that received the order. It is proposed to add the following value required by CAT Phase 2A:

- **FB = Floor Broker**

## 2.5 Fulfillment Identifiers

Trades that do not require public dissemination, e.g. if the beneficial owner does not change, are defined as *order fulfillment events* in CAT as opposed to *trade events*. Identifiers for fulfillments may be amended but then require reporting of the prior fulfillment identifier.

FIX provides the field ExecRefID(19) for this use case but it is currently not available on the **TradeCaptureReport(35=AE)** message. This is required for CAT Phase 2A and it is proposed to add this field to support the CAT event MEFA.

## 2.6 ATS Display Indicator

CAT requires some additional reporting by alternative trading systems (ATSs). The display indicator allows to indicate if the order is displayed outside of the ATS to subscribers only, or via publicly disseminated quotation data.

FIX provides the repeating group TrdRegPublicationGrp for this use case but it currently not available on the **NewOrderSingle(35=D)** message. This is required for CAT Phase 2A and it is proposed to add this field to support the CAT event MECO.
