DISCLAIMER

THE INFORMATION CONTAINED HEREIN AND THE FINANCIAL INFORMATION EXCHANGE PROTOCOL (COLLECTIVELY, THE "FIX PROTOCOL") ARE PROVIDED "AS IS" AND NO PERSON OR ENTITY ASSOCIATED WITH THE FIX PROTOCOL MAKES ANY REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, AS TO THE FIX PROTOCOL (OR THE RESULTS TO BE OBTAINED BY THE USE THEREOF) OR ANY OTHER MATTER AND EACH SUCH PERSON AND ENTITY SPECIFICALLY DISCLAIMS ANY WARRANTY OF ORIGINALITY, ACCURACY, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. SUCH PERSONS AND ENTITIES DO NOT WARRANT THAT THE FIX PROTOCOL WILL CONFORM TO ANY DESCRIPTION THEREOF OR BE FREE OF ERRORS. THE ENTIRE RISK OF ANY USE OF THE FIX PROTOCOL IS ASSUMED BY THE USER.

NO PERSON OR ENTITY ASSOCIATED WITH THE FIX PROTOCOL SHALL HAVE ANY LIABILITY FOR DAMAGES OF ANY KIND ARISING IN ANY MANNER OUT OF OR IN CONNECTION WITH ANY USER'S USE OF (OR ANY INABILITY TO USE) THE FIX PROTOCOL, WHETHER DIRECT, INDIRECT, INCIDENTAL, SPECIAL OR CONSEQUENTIAL (INCLUDING, WITHOUT LIMITATION, LOSS OF DATA, LOSS OF USE, CLAIMS OF THIRD PARTIES OR LOST PROFITS OR REVENUES OR OTHER ECONOMIC LOSS), WHETHER IN TORT (INCLUDING NEGLIGENCE AND STRICT LIABILITY), CONTRACT OR OTHERWISE, WHETHER OR NOT ANY SUCH PERSON OR ENTITY HAS BEEN ADVISED OF, OR OTHERWISE MIGHT HAVE ANTICIPATED THE POSSIBILITY OF, SUCH DAMAGES.

DRAFT OR NOT RATIFIED PROPOSALS (REFER TO PROPOSAL STATUS AND/OR SUBMISSION STATUS ON COVER PAGE) ARE PROVIDED "AS IS" TO INTERESTED PARTIES FOR DISCUSSION ONLY. PARTIES THAT CHOOSE TO IMPLEMENT THIS DRAFT PROPOSAL DO SO AT THEIR OWN RISK. IT IS A DRAFT DOCUMENT AND MAY BE UPDATED, REPLACED, OR MADE OBSOLETE BY OTHER DOCUMENTS AT ANY TIME. THE FPL GLOBAL TECHNICAL COMMITTEE WILL NOT ALLOW EARLY IMPLEMENTATION TO CONSTRAIN ITS ABILITY TO MAKE CHANGES TO THIS SPECIFICATION PRIOR TO FINAL RELEASE. IT IS INAPPROPRIATE TO USE FPL WORKING DRAFTS AS REFERENCE MATERIAL OR TO CITE THEM AS OTHER THAN “WORKS IN PROGRESS”. THE FPL GLOBAL TECHNICAL COMMITTEE WILL ISSUE, UPON COMPLETION OF REVIEW AND RATIFICATION, AN OFFICIAL STATUS ("APPROVED") OF/FOR THE PROPOSAL AND A RELEASE NUMBER.

No proprietary or ownership interest of any kind is granted with respect to the FIX Protocol (or any rights therein).

1 Introduction

1.1 The MMT Initiative

The MMT was developed in the times of MiFID I through the collaborative efforts of exchanges, MTF's, market data vendors and trade reporting venues as a means of standardizing post-trade data reporting. Though much of it stems from an inherent lack of standards in the OTC market, Regulated Markets and MTFs also need to support a single industry standard that can be applied across all sources of post-trade data.

MMT has now been established for several years and also has been integrated into genuine FIX representation in 2012/2013 (EP 163, EP 186, EP 216). With the arrival of MiFID II it has been remodeled in order to become a tool for fulfilling all MIFID II post-trade flagging requirements (cf. below)

Current MMT documentation can be found at [FIX Trading Community - Market Model Typology (MMT)]

1.2 MiFID II, MMT and FIX – update for MMT v3.50

1.2.1 Relationship between MiFID II transparency requirements and MMT

MMT delivers a model for categorizing trades by means of trade flags and hence intends to cover the "trade flagging" requirements as set forth in the "Regulatory technical and implementing standards - " for MiFID II / MiFIR (RTS), specifically in

- RTS 1 - as adopted - ("COMMISSION DELEGATED REGULATION (EU) …/...of 14.7.2016 supplementing Regulation (EU) No 600/2014 of the European Parliament and of the Council on markets in financial instruments with regard to regulatory technical standards on transparency requirements for trading venues and investment firms in respect of shares, depositary receipts, exchange-traded funds, certificates and other similar financial instruments and on transaction execution obligations in respect of certain shares on a trading venue or by a systematic internaliser") and
- RTS 2 - as adopted - ("COMMISSION DELEGATED REGULATION (EU) …/...of 14.7.2016 supplementing Regulation (EU) No 600/2014 of the European Parliament and of the Council on markets in financial instruments with regard to regulatory technical standards on transparency requirements for trading venues and investment firms in respect of bonds, structured finance products, emission allowances and derivatives")

In each of these RTS documents, ESMA specified a number of flags they require to be set in order to mark special circumstances relevant to and properties of a trade being published.

The two tables below (extracted from the RTS) list the flags which represent the cases that on the one hand MMT intends to cover (making use of its own encoding) and on the other hand need to be represented by a suitable combination of FIX fields/values. The way this is accomplished can be seen in the tables of chapter 2.

It is important to note that other transparency aspects of RTS 1 and 2 are not addressed by MMT nor by this gap analysis.

In addition to flags prescribed in regulation, FIX MMT v3.50 embeds additional flags proposed by FIX to improve the overall post-trade transparency. The additional flags in v3.50 reflect industry Best Practices Proposals.

Additional Flags Requested by FIX members as Best Practices Proposals

Reference	**Flag**	**Name of Flag**	**Type of execution/publication venue**	**Description**
FIX Consolidated Tape Equity and Fixed-Income Working Groups	'PORT'	Portfolio Flag	RM, MTF, OTF APA CTP	Transaction is part of a portfolio trade
	'NTLS'	Trade above Large in Scale Flag		Flag to mark OTC trades that are above Large in Scale and brought onto a venue
	'IAFF'	Inter-affiliate Trade Flag		Introduce a new flag to mark trades undertaken between legal entities of a single company where those transactions are considered to be for 'housekeeping' purposes
	'OVSP'	Trade Brought On Venue Flag		Trades brought on a venue purely for clearing purposes
	'OTRH'	Out of trade reporting hours Flag		Introduce a new flag to mark trades that have been published the business day after trade date due to the trade being published to an APA or trading venue outside its operating hours

1.3 Proposed enhancements to FIX

1.3.1 MMT support in FIX message types

The introductory gap analysis explained: "As MMT is dealing with trade reporting to the public (which must not neglect the starting point of the "supply chain") and the trading parties' "private" attributes are irrelevant, MMT should be supported by the following FIX message types: MarketDataSnapshotFullRefresh(35=W), MarketDataIncrementalRrefresh(35=X), TradeCaptureReport(35=AE), (the last one needing no structural change but carrying new values in some fields) whereas the ExecutionReport(35=8) will not be an MMT-supporting message type."

1.3.2 Modified FIX components

The following message types require amendments:

- MarketDataSnapshotFullRefresh(35=W) to be enhanced by **adding**
  - existing field IntraFirmTradeIndicator(2373) to component **MDFullGrp**
  - existing field SecondaryTrdType(855) to component **MDFullGrp**
  - new field TertiaryTrdType(2896) **MDFullGrp**

- MarketDataIncrementalRefresh(35=X) to be enhanced by **adding**
  - existing field IntraFirmTradeIndicator(2373) to component **MDIncGrp**
  - existing field SecondaryTrdType(855) to component **MDIncGrp**
  - new field TertiaryTrdType(2896) **MDIncGrp**

1.3.3 New FIX fields

A new FIX field is suggested as follows:

- TertiaryTrdType(2896) to support up to three different trade types in a single message.

1.3.4 Modified FIX fields

New enumerations are suggested to be added to the following FIX fields:

- TrdSubType(829): 53=Trade submitted to venue for clearing and settlement
- TrdRegPublicationReason(2670): 16=Reported outside of reporting hours

Deprecate TradeCondition(277) = 6 (Benchmark) in favor of using SecondaryTrdType(855) or TertiaryTrdType(2896).

2 Business Requirements

2.1 Mapping of MMT v3.50 semantics to FIX

Version 3.50 of the MMT data model is an extension to Version 3.04 as presented in the previous FIX gap analysis introducing MMT (EP163/EP186/EP216). Below tables show the new mapping in its final state, avoiding confusion.

Rationale for the new trade flags and corresponding FIX mapping

#	Area	Summary	Background
1	Non-Price forming, but addressable Liquidity	Introduce a new flag to mark portfolio trades (as per RTS 1 article 2b) *Recommended value [PORT]* *[PORT] and [BENC, PORT] are also anticipated for Fixed-Income Trades*	RTS1 Article 2 provides a list of activities that are considered non price forming. It is the view of the consolidated tape working group that all such activities are considered not to be addressable liquidity with the exception of the following RTS 1 article 2a – The transaction is executed by reference to a price that is calculated over multiple time instances according to a given benchmark, including transactions executed by reference to a volume-weighted average price or a time-weighted average price – these trades can be identified using the ESMA BENC flag RTS 1 article 2b – The transaction is part of a portfolio trade – it is these that the group considers covering under a new flag. Introduction of this PORT flag will, for the first time, make it possible to distinguish between addressable and non-addressable volume in the presence of a TNCP or PRIC flag.

#	Area	Summary	Background
2	Large in Scale	Introduce a new flag to mark OTC trades that are above Large in Scale and brought onto a venue *Recommended value [NTLS]*	There is no MiFID flag for large in scale negotiated trades and hence they are indistinguishable from large executions traded directly on venues (e.g. on order books) in cases where a venue supports both on-book and off-book trading.

#	Area	Summary	Background
3	Inter-affiliate group Transactions	Introduce a new flag to mark trades undertaken between legal entities of a single company where those transactions are considered to be for 'housekeeping' purposes (e.g. position management) or intercompany back-to-back trades *Recommended value [IAFF]* *[IAFF] is also anticipated for Fixed-Income Trades*	Some trading activity between entities of a single company is considered not to be addressable liquidity and hence should be flagged accordingly. A good example is that of position movements between affiliate entities, often at the end of the day, which has caused an apparent rise in OTC or SI activity, particularly given the structural changes at many investment firms arising from their Brexit preparations. It is noted that some inter-affiliate activity should be considered to be addressable liquidity, for example where that trade could have been undertaken between an affiliate and an entirely different investment firm and the decision to trade with another affiliate was based purely on factors such as best execution.

#	Area	Summary	Background
4	Trades brought on a venue purely for clearing purposes	Introduce a new flag to mark OTC trades bought on a trading venue purely for clearing and settlement purposes *Recommended value [OVSP]*	These transactions only became trade reportable under MiFID II and are trades purely for settlement purposes, they create noise on the tape, but should be clearly identified.

#	Area	Summary	Background
5	Out of trade reporting hours	Introduce a new flag to mark trades that have been published the business day after trade date due to the trade being published to an APA or trading venue outside its operating hours *Recommended value [OTRH]*	Trades published after the trade reporting facility being used (i.e. APA for, for trades brought onto a trading venue, the trading venue) closes will be reported the following morning and not flagged as deferred (as the MiFID deferral regime is not being applied). Such trades can be distinguished from trades being executed (and published) at the same time in the morning by comparing the execution time and publication time, though the group considered that a specific flag for this purpose would be easier to use. It is recommended that this flag be set by the APAs (as opposed to publishing investment firms) to ease implementation and ensure the most accurate use of this flag.

2.1.1 Per-value mapping

Level	Full Name	Type	Business Workflow	FIX Mapping
3.2	Transaction Type : Negotiation Indicator Or Pre-Trade Transparency Waiver	NTLS	Trade Reporting	TradeCaptureReport(35=AE) TrdRegPublicationType(2669) = 0 (PreTradeTransparencyWaiver) TrdRegPublicationReason(2670) = 9 (No public price quoted due to LIS)

Level	Full Name	Type	Business Workflow	FIX Mapping
				PreviouslyReported(570) = Y IntraFirmTradeIndicator (2373) = Y

3 Issues and Discussion Points

3.1 Identification of benchmark trades for market data publication

Benchmark trades have previously been identified by SecondaryTrdType(855) = 64 (Benchmark) in the context of trade reporting and by TradeCondition(277) = 6 (Benchmark) in the context of market data publication. This design for the mapping of the MMT flag "BENC" was chosen for EP163 to minimize the impact on the existing components MDFullGrp and MDIncGrp as part of the FIX market data messages.

The requirement of MMT v3.5 to additionally identify portfolio trades (and the possibility of a trade being both benchmark and portfolio) has led to the introduction of a third trade type field, i.e. TertiaryTrdType(2896) for trade reporting.

The mapping of the MMT flag "BENC" is now changed to align the design for the context of trade reporting and market data publication. TradeCondition(277) = 6 (Benchmark) is deprecated but will continue to be available for backward compatibility. However, it is recommended to move to SecondaryTrdType(855) for market data publication.

4 Proposed Message Flow

There are no changes to existing message flows.

5 FIX Message Tables

5.1 FIX Message TradeCaptureReport

To be completed at the time of the proposal – all information provided will be stored in the repository	
Message Name	TradeCaptureReport
Message Abbreviated Name (for FIXML)	TrdCaptRpt
Category	TradeCapture
Action	CHANGE
Message Synopsis	The Trade Capture Report message can be: - Used to report trades between counterparties. - Used to report trades to a trade matching system - Can be sent unsolicited between counterparties. - Sent as a reply to a Trade Capture Report Request. - Can be used to report unmatched and matched trades.

6 FIX Component Blocks

6.1 Component TrdRegPublicationGrp

This is a new component to describe special regulatory circumstances for publishing more or less than usual related to a trade (e.g. pre-trade transparency waivers or trade deferral reasons).

To be completed at the time of the proposal – all information provided will be included in the repository	
Component Name	***TrdRegPublicationGrp***
Component Abbreviated Name (for FIXML)	TrdRegPublctn
Component Type	_X_ Block Repeating ___ Block
Category	Common
Action	NONE (only provided to show MMT usage comments)
Component Synopsis	The TrdRegPublicationGrp component is used to express trade publication reasons that are required by regulatory agencies. Reasons may include deferrals, exemptions, waivers, etc.
Component Elaboration	Under the MiFID II regulation, this is used for indicating the reduction of pre- (“waivers”) or post-trade transparency. In cases where a trade has been made outside an open order book venue or publication of trade data has been deferred, pertinent reason indicators are set in the TrdRegPublicationReason(2670) to further qualify the TrdRegPublicationType(2669).
To be finalized by intFPL Technical Office	
Repository Component ID	1072

Component FIXML Abbreviation: <TrdRegPublctnGrp>						
Tag	*Field Name*	*Req'd*	*XMLName*	*FIX Spec Comments*	***Action***	***Mappings and Usage Comments***
2668	NoTrdRegPublications	N				Use for MMT POST TRADE DEFERRAL: REASON, MMT NEGOTIATION INDICATOR OR PRE-TRADE TRANSPARENCY WAIVER, MMT BENCHMARK OR REFERENCE PRICE INDICATOR When representing MMT v3, this counter cannot be greater than 2
→2669	TrdRegPublicationType	N		Required if NoTrdRegPublications(26		Use for MMT POST TRADE DEFERRAL: REASON MMT

				68) > 0.		NEGOTIATION INDICATOR OR PRE-TRADE TRANSPARENCY WAIVER, MMT BENCHMARK OR REFERENCE PRICE INDICATOR
→2670	TrdRegPublicationReason	N				Use for MMT POST TRADE DEFERRAL: REASON MMT NEGOTIATION INDICATOR OR PRE-TRADE TRANSPARENCY WAIVER, MMT BENCHMARK OR REFERENCE PRICE INDICATOR OR DEFERAL DUE TO OUT OF HOURS REPORTING
</TrdRegPublctnGrp>						

6.2 Component MDFullGrp

To be completed at the time of the proposal – all information provided will be included in the repository	
Component Name	MDFullGrp
Component Abbreviated Name (for FIXML)	Full
Component Type	_X_ Block Repeating ___ Block
Category	MarketData
Action	CHANGE
Component Synopsis	
Component Elaboration	
To be finalized by intFPL Technical Office	
Repository Component ID	2031

Component FIXML Abbreviation: <MDFullGrp>						
Tag	*Field Name*	*Req'd*	*XMLName*	*FIX Spec Comments*	***Action***	***Mappings and Usage Comments***
268	NoMDEntries	Y		Number of entries following.		
→269	***MDEntryType***	Y	Typ	Must be the first field in this repeating group.		
→278	***MDEntryID***	N	MDID	Conditionally required when maintaining an		

				order-depth book, that is, when AggregatedBook (266) is "N". allows subsequent Incremental changes to be applied using MDEntryID.		
→270	***MDEntryPx***	N	Px	Conditionally required if MDEntryType is not Imbalance(A)), Trade Volume (B), or Open Interest(C); Conditionally required when MDEntryType = "auction clearing price"		
→423	***PriceType***	N	PxTyp			
→Component<YieldData>		***N***	***Yield***	***Insert here the set of YieldData (yield-related) fields defined in "Common Components of Application Messages***		
→Component <SpreadOrBenchmarkCurveData>		***N***	***SprdBnchmkCurve***	***Insert here the set of SpreadOrBenchmarkCurveData (Fixed Income spread or benchmark curve) fields defined in Common Components of Application Messages***		
→40	***OrdType***	N	OrdTyp	Used to support market mechanism type; limit order, market order, committed principal order		
→15	***Currency***	N	Ccy	Can be used to specify the currency of the quoted price.		
→120	***SettlCurrency***	N	SettlCcy	Required for NDFs to specify the settlement currency (fixing currency).		
→Component <RateSource>		***N***	***RtSrc***			
→271	***MDEntrySize***	N	Sz	Conditionally required if MDEntryType = Bid(0), Offer(1), Trade(2)), Trade Volume (B), or Open Interest(C) conditionally required when MDEntryType = "auction clearing price"		
→Component <SecSizesGrp>		***N***	***SecSizesGrp***			
→1093	***LotType***	N	LotTyp	Can be used to specify the lot type of the quoted size in order depth books.		
→272	***MDEntryDate***	N	Dt			
→273	***MDEntryTime***	N	Tm			
→274	***TickDirection***	N	TickDirctn			

→275	***MDMkt* (Field deprecated as of FIX.5.0)**	N	Mkt	**(Usage deprecated as of FIX.5.0)** Market posting quote / trade. Valid values: See Volume 6: Appendix 6-C		
→336	***TradingSessionID***	N	SesID			**Use for MMT** Conditionally required in MMT-supporting messages if MDOriginType(1024)<>1 (Off Book)
→625	***TradingSessionSubID***	N	SesSub			Use for MMT TRADING MODE Conditionally required in MMT-supporting messages if MDOriginType(1024)<>1 (Off Book)
→326	***SecurityTradingStatus***	N	TrdgStat			
→327	***HaltReason***	N	HaltRsn			
→2447	***FastMarketIndicator***	N	FastMktInd			
→276	***QuoteCondition***	N	QCond	Space-delimited list of conditions describing a quote.		
→277	***TradeCondition***	N	TrdCond	Space-delimited list of conditions describing a trade		~~Use for MMT BENCHMARK OR REFERENCE PRICE INDICATOR~~
→Component <TradePriceConditionGrp>		***N***	***TrdPxConds***			Use for MMT SPECIAL DIVIDEND INDICATOR, TRADE WITH PRICE IMPROVEMENT, and CONTRUBUTION TO PRICE FORMATION
→2667	AlgorithmicTradeIndicator	N	AlgoTrdInd			Use for MMT ALGORITHMIC INDICATOR Under MiFID II this indicator is set once at least one submitted order was generated by an algo.
→282	***MDEntryOriginator***	N	Orig			
→283	***LocationID***	N	LctnID			
→284	***DeskID***	N	DeskID			
→286	***OpenCloseSettlFlag***	N	OpenClsSettlFlag	Used if MDEntryType = Opening Price(4), Closing Price(5), or Settlement		

				Price(6).		
→59	***TimeInForce***	N	TmInForce	For optional use when this Bid or Offer represents an order		
→432	***ExpireDate***	N	ExpireDt	For optional use when this Bid or Offer represents an order. ExpireDate and ExpireTime cannot both be specified in one Market Data Entry.		
→126	***ExpireTime***	N	ExpireTm	For optional use when this Bid or Offer represents an order. ExpireDate and ExpireTime cannot both be specified in one Market Data Entry.		
→1629	***ExposureDuration***	N	ExpsreDur	Conditionally required when TimeInForce(59)=10 (Good for Time)		
→1916	***ExposureDurationUnit***	N	ExpsreDurUnit			
→110	***MinQty***	N	MinQty	For optional use when this Bid or Offer represents an order		
→287	***SellerDays***	N	SellerDays			
→37	***OrderID***	N	OrdID	For optional use when this Bid, Offer, or Trade represents an order		
→198	***SecondaryOrderID***	N	OrdID2	For optional use to support Hit/Take (selecting a specific order from the feed) without disclosing a private order id.		
→299	***QuoteEntryID***	N	EntryID	For optional use when this Bid, Offer, or Trade represents a quote		
→1003	***TradeID***	N	TrdID	For optional use in reporting Trades.		
→1851	***StrqtegyLinkID***	N	StrategyLinkID	For optional use in reporting Trades. May be used to link together trades that are reported separately but are part of the same overall trade, e.g. spread trade and their constituent trades.		
→288	***MDEntryBuyer***	N	Buyer	For optional use in reporting Trades		
→289	***MDEntrySeller***	N	Seller	For optional use in reporting Trades		
→2449	***NumberOfBuyOrders***	N	NumOfBuyOrds	For optional use in reporting Trades		
→2450	***NumberOfSellOrders***	N	NumOfSell Ords	For optional use in reporting Trades		

→346	***NumberOfOrders***	N	NumOfOrds	In an Aggregated Book, used to show how many individual orders make up an MDEntry		
→290	***MDEntryPositionNo***	N	PosNo	Display position of a bid or offer, numbered from most competitive to least competitive, per market side, beginning with 1		
→546	***Scope***	N	Scope			
→811	***PriceDelta***	N	PxDelta			
→828	***TrdType***	N	TrdTyp	Specifies trade type when a trade is being reported. Must be used when MDEntryType(269) = Trade(2).		Use for MMT TRANSACTION CATEGORY **Conditionally required in all MMT-supporting messages**
→829	***TrdSubType***	N	TrdSubTyp	For optional use in reporting Trades		Use for MMT CROSSING TRADE INDICATOR + for Trade brought on venue for clearing purposes
→855	***SecondaryTrdType***	N	TrdTyp2	For optional use in reporting trades. Conditionally requires presence of TrdType(828)	ADD	Use for MMT BENCHMARK OR REFERENCE PRICE OR PORTFOLIO TRADE INDICATOR
→2896	***TertiaryTrdType***	N	TrdTyp3	For optional use in reporting trades. Conditionally requires presence of SecondaryTrdType(855)	ADD	Use for MMT BENCHMARK OR REFERENCE PRICE OR PORTFOLIO TRADE INDICATOR
→1934	***RegulatoryReportType***	N	RegRptTyp	Used only when reporting a trade (MDEntryType(269)=2 (Trade)) that is a regulatory trade report.		Use for MMT POST-TRADE DEFERRAL OR ENRICHMENT : TYPE MiFID II: Required if NCA special deferral is applied
→2405	***ExecMethod***	N	ExecMeth			Use for MMT OFF BOOK AUTOMATED INDICATOR
→574	***MatchType***	N				Use for MMT TRADING MODE Conditionally required in MMT-supporting messages if MDOriginType(1024)=1 (Off- Book)
→1115	***OrderCategory***	N				
→1390	***TradePublishIndicator***	N				Use for MMT PUBLICATION MODE / POST-TRADE DEFERRAL: REASON or MMT POST-

						TRADE DEFERRAL OR ENRICHMENT : TYPE depending on type of deferral
→Component <TrdRegPublicationGrp>		***N***	***TrdRegPublictnGrp***			Use for MMT POST TRADE DEFERRAL: REASON, MMT NEGOTIATION INDICATOR OR PRE-TRADE TRANSPARENCY WAIVER, MMT REFERENCE PRICE INDICATOR
→2373	***IntraFirmTradeIndicator***	N	IntraFirmTrdInd		ADD	Used for MMT DUPLICATIVE INDICATOR to identify Interaffiliate Trades
→570	PreviouslyReported	N	PrevlyRpted			Use for MMT DUPLICATIVE INDICATOR where “the market” is the receiving party, Set for any trade report sent in addition to the original one.
→Component <RelatedTradeGrp>		***N***	***ReltdTrd***	For optional use when reporting trades. Lists trades related to the current market data entry, e.g. leg trades of a multi-leg trade.		
→58	***Text***	N	Txt	Text to describe the Market Data Entry. Part of repeating group.		
→354	***EncodedTextLen***	N	EncTxtLen	Must be set if EncodedText field is specified and must immediately precede it.		
→355	***EncodedText***	N	EncTxt	Encoded (non-ASCII characters) representation of the Text field in the encoded format specified via the MessageEncoding field.		
→1023	***MDPriceLevel***	N	MDPxLvl	Display position of a bid or offer, numbered from most competitive to least competitive, per market side, beginning with 1		
→528	***OrderCapacity***	N	Cpcty	Designates the capacity of the firm placing the order		
→1024	***MDOriginType***	N	MDOrigTyp			***Use for MMT MARKET MECHANISM*** ***Conditionally required in all MMT-supporting messages***

→332	***HighPx***	N	HighPx	Used to report high price in association with trade, bid or ask rather than a separate entity		
→333	***LowPx***	N	LowPx	Used to report low price in association with trade, bid or ask rather than a separate entity		
→1025	***FirstPx***	N	FirstPx	Indicates the first price of a trading session; can be a bid, ask, or trade price.		
→31	***LastPx***	N	LastPx	Indicates the last price of a trading session; can be a bid, ask, or trade price.		
→1592	***DiscountFactor***	N	DiscFctr			
→1020	***TradeVolume***	N	TrdVol	Used to report trade volume in association with trade, bid or ask rather than a separate entity		
→731	***SettlPriceType***	N	SettlTyp			
→2451	***SettlPriceDeterminationMethod***	N	SettlPxDtrmnMeth			
→63	***SettlType***	N	SettlTyp			
→64	***SettlDate***	N	SettlDt	Indicates date on which instrument will settle. For NDFs required for specifying the "value date".		
→1070	***MDQuoteType***	N	MDQteTyp			
→83	***RptSeq***	N	RptSeq	Used to identify the sequence number within a feed type		
→1048	***DealingCapacity***	N	DealingCpcty	Identifies role of dealer; Agent, Principal, RisklessPrincipal		
→1026	***MDEntrySpotRate***	N	MDEntrySpotRt			
→1027	***MDEntryForwardPoints***	N	MDEntryFwdPnts			
→Component <Parties>		N	Pty			
→2445	***AggressorTime***	N	AgrsrTm			
→2446	***AggressorSide***	N	AgrsrSide			
→654	***LegRefID***	N	RefID	May be specified for an MDEntryType(269)=2 (Trade) entry to indicate that MDEntryPx(270), PriceType(423) and MDEntrySize(271) apply to the instance of the InstrmtLegGrp		

				component with matching LegID(1788).		
</MDFullGrp>						

6.3 Component MDIncGrp

To be completed at the time of the proposal – all information provided will be included in the repository	
Component Name	MDIncGrp
Component Abbreviated Name (for FIXML)	Inc
Component Type	___ Block Repeating ___ Block
Category	MarketData
Action	
Component Synopsis	
Component Elaboration	
To be finalized by intFPL Technical Office

→***59***	***TimeInForce***	N	TmInForce	For optional use when this Bid or Offer represents an order		
→***432***	***ExpireDate***	N	ExpireDt	For optional use when this Bid or Offer represents an order. ExpireDate and ExpireTime cannot both be specified in one Market Data Entry.		
→***126***	***ExpireTime***	N	ExpireTm	For optional use when this Bid or Offer represents an order. ExpireDate and ExpireTime cannot both be specified in one Market Data Entry.		
→***1629***	***ExposureDuration***	N	ExpsreDur	Conditionally required when TimeInForce(59)=10 (Good for Time)		
→***1916***	***ExposureDurationUnit***	N	ExpsreDurUnit			
→***110***	***MinQty***	N	MinQty	For optional use when this Bid or Offer represents an order		

→287	***SellerDays***	N	SellerDays			
→37	***OrderID***	N	OrdID	For optional use when this Bid, Offer, or Trade represents an order		
→198	***SecondaryOrderID***	N	OrdID2	For optional use to support Hit/Take (selecting a specific order from the feed) without disclosing a private order id.		
→299	***QuoteEntryID***	N	EntryID	For optional use when this Bid, Offer, or Trade represents a quote		
→1003	***TradeID***	N	TrdID	For optional use in reporting Trades		
→1851	***StrategyLinkID***	N	StrategyLinkID	For optional use in reporting Trades. May be used to link together trades that are reported separately but are part of the same overall trade, e.g. spread trade and their constituent trades.		
→288	***MDEntryBuyer***	N	Buyer	For optional use in reporting Trades		
→289	***MDEntrySeller***	N	Seller	For optional use in reporting Trades		
→2449	***NumberOfBuyOrders***	N	NumOfBuyOrds			
→2450	***NumberOfSellOrders***	N	NumOfSellOrds			
→346	***NumberOfOrders***	N	NumOfOrds	In an Aggregated Book, used to show how many individual orders make up an MDEntry		
→290	***MDEntryPositionNo***	N	PosNo	Display position of a bid or offer, numbered from most competitive to least competitive, per market side, beginning with 1		
→546	***Scope***	N	Scope			
→811	***PriceDelta***	N	PxDelta			
→451	***NetChgPrevDay***	N	NetChgPrevDay			
→58	***Text***	N	Txt	Text to describe the Market Data Entry. Part of repeating group.		
→354	***EncodedTextLen***	N	EncTxtLen	Must be set if EncodedText field is specified and must immediately precede it.		
→355	***EncodedText***	N	EncTxt	Encoded (non-ASCII characters) representation of the Text field in the encoded format specified via the MessageEncoding field.		
→1023	***MDPriceLevel***	N	MDPxLvl			

→528	***OrderCapacity***	N	Cpcty			
→1024	***MDOriginType***	N	MDOrigTyp			**Use for MMT MARKET MECHANISM** **Conditionally required in all MMT-supporting messages**
→332	***HighPx***	N	HighPx			
→333	***LowPx***	N	LowPx			
→1025	***FirstPx***	N	FirstPx	Indicates the first price of a trading session; can be a bid, ask, or a trade price.		
→31	***LastPx***	N	LastPx	Indicates the last price of a trading session; can be a bid, ask, or a trade price.		
→1592	***DiscountFactor***	N	DiscFctr			
→1020	***TradeVolume***	N	TrdVol			
→731	***SettlPriceType***	***N***	***SettlTyp***			
→2451	***SettlPriceDeterminationMethod***	***N***	***SettlPxDtrmnMeth***			
→63	***SettlType***	N	SettlTyp			
→64	***SettlDate***	N	SettlDt	Indicates date on which instrument will settle. For NDFs required for specifying the "value date".		
→483	***TransBkdTime***	N	TransBkdTm	For optional use in reporting Trades. Used to specify the time of trade agreement for privately negotiated trades.		
→60	***TransactTime***	N	TxnTm	For optional use in reporting Trades. Used to specify the time of matching.		
→2445	***AggressorTime***	***N***	***AgrsrTm***			
→2446	***AggressorSide***	***N***	***AgrsrSide***			
→1070	***MDQuoteType***	N	MDQteTyp			
→83	***RptSeq***	N	RptSeq	Allows sequence number to be specified within a feed type		
→1048	***DealingCapacity***	N	DealingCpcty	Identifies role of dealer; Agent, Principal, RisklessPrincipal		
→1026	***MDEntrySpotRate***	N	MDEntrySpotRt			
→1027	***MDEntryForwardPoints***	N	MDEntryFwdPnts

Appendix A - Data Dictionary

Tag	FieldName	Action	Datatype	Description	FIXML Abbreviation	Add to / Deprecate from Message type or Component block
2896	TertiaryTrdType	NEW	int	Type of trade assigned to a trade. Used in addition to TrdType(828) and SecondaryTrdType(855). Must not be used when only one additional trade type needs to be assigned. [uses enums from TrdType(828)]	@TrdTyp3	Add to message TradeCaptureReport(35=AE) Add to components MDFullGrp and MDIncGrp
855	SecondaryTrdType	CHANGE	int	Type of trade assigned to a trade. Used in addition to TrdType(828). Must not be used when only one trade type needs to be assigned. [uses enums from TrdType(828)]	@TrdTyp2	Add to components MDFullGrp and MDIncGrp
828	TrdType	CHANGE	int	Type of trade assigned to a trade. Valid values: 50 = Portfolio trade Elaboration: Identifies a collection/basket of trades. In the context of bonds (e.g. corporate bonds) these are transacted as a single trade at an aggregate price for the entire portfolio and may be traded all-or-none or most-or-none depending on bilateral agreement. In the context of ESMA RTS 1 Article 2(b),	@TrdTyp	

				may be used to refer to portfolio trades to distinguish between addressable and non-addressable volume. In the context of Market Model Typology (MMT), use of this value applies to SecondaryTrdType(855) or TertiaryTrdType(2896), and when used for MMT market data publication requires MDEntryType(269) = 2 (Trade). 62 = Dark trade Elaboration: ~~A Market Model Typology dark trade might also come from a lit/hybrid book, when an aggressive lit order hits a resting dark order.~~ In the context of Market Model Typology (MMT), a dark trade might also come from a lit/hybrid book (e.g. when an aggressive lit order hits a resting dark order). The use of this value applies to TrdType(828), and when used for MMT market data publication requires MDEntryType(269) = 2 (Trade). 64 = Benchmark Elaboration: ~~For Market Model Typology (MMT) the "benchmark" price depends on a benchmark which has no current price but was derived from a time series such as a VWAP.~~ In the context of ESMA RTS 1 Article 2(a), may be used to refer to benchmark trades.		

				In the context of Market Model Typology (MMT), the "benchmark" price depends on a benchmark which has no current price but was derived from a time series such as a VWAP. The use of this value applies to SecondaryTrdType(855) or TertiaryTrdType(2896), and when used for MMT market data publication requires MDEntryType(269) = 2 (Trade). 65 = Package trade Elaboration: Identifies the pseudo-trade of a stream or collection of trades to be transacted, cleared and be reported as an atomic unit. The subsequent actual trades reported should not have this value. In the context of ESMA RTS 2 Article 1(1)(b), may be used to refer to package transactions (excluding exchange for physicals). In the context of Market Model Typology (MMT), use of this value applies to TrdType(828), and when used for MMT market data publication requires MDEntryType(269) = 2 (Trade).		
829	TrdSubType	CHANGE	int	Further qualification to the trade type Valid values: 0 = CMTA ... 52 = Trade At Cash Open (TACO)	@TrdSubTyp	

				53 = Trade submitted to venue for clearing and settlement Elaboration: Identifies trades brought on a trading venue purely for clearing and settlement purposes. [Symbolic name: TrdSubmitVenueClrSettl]		
277	TradeCondition	CHANGE	MultipleStringValue	Type of market data entry. Valid values: 6=Benchmark [DEPRECATE]	@TrdCond	
2373	IntraFirmTradeIndicator	ADD	Boolean	Indicates whether the trade or position was entered into as an intra-group transaction, i.e. between two units of the same parent entity having majority ownership interest in both counterparties. Elaboration: In the context of EMIR this refers to Regulation (EU) 648/2012 Article 3 "intragroup transactions" section 1 which states: "In relation to a non-financial counterparty, an intragroup transaction is an OTC derivative contract entered into with another counterparty which is part of the same group provided that both counterparties are included in the same consolidation on a full basis and they are	@IntraFirmTrdInd	Add to components MDFullGrp and MDIncGrp

				subject to an appropriate centralised risk evaluation, measurement and control procedures and that counterparty is established in the Union or, if it is established in a third country, the Commission has adopted an implementing act under Article 13(2) in respect of that third country. Canada's similar requirement is under Appendix A to OSC Rule 91-507."		
2670	TrdRegPublication Reason	CHANGE	int	Additional reason for trade publication type specified in TrdRegPublicationType(2669). Reasons may be specific to regulatory trade publication rules. Valid values: 0 = No preceding order in book as transaction price set within average spread of a liquid instrument … 15 = Exception due to intra-firm order 16 = Reported outside of reporting hours Elaboration: In the context of ESMA, trades published after the trade reporting facility being used (e.g. APA for trades brought onto a trading venue) closes, will be reported the following business day and not flagged as deferred (as the MiFID deferral regime is not applicable). This value distinguishes these types of trades from trades executed (and published) on the	@Rsn	

				same business day. It is recommended that this value be set by the trade reporting facility, e.g. APAs, (as opposed to publishing investment firms) to ensure the most accurate use of this value.
